PROJECTS & OPEN-SOURCE

Animating Buttons |  

React, HTML, CSS, JS

- Open-Source Project to add animating buttons' HTML and CSS code. The code is then rendered as a React component and visible on the webpage.
- Functionality to download the code for buttons and preview the animations.

React Awesome Shapes |  

React, Typescript, Styled Components

- Opensource library used to import awesome shapes made using background-clip into React Components.
- 4 of my pull requests got merged consisting of shapes like arrow, square-donut, cross and star.

FlipVerse |  

MERN, Solidity, Hardhat, Moralis, Ethereum, MetaMask

- Developed a fullstack Web 3.0 E-Commerce application where retailers can create digital warranty card in the form of NFT, and the users can receive these NFTs after purchasing a product.
- Warranty NFT's are decaying in nature i.e they stop working after the duration is over or warranty is redeemed.
- Features include JWT Authentication, verification of ownership, sending the user an E-Mail and many more.
